Your interest, voice and contribution are needed in the effort to protect, preserve and restore Iowa’s native flora. Join the Iowa Native Plant Society and participate in the process.

The INPS sponsors a lively email discussion group focusing on diverse aspects of native plants management and preservation.

The list serve is managed by:
Diana Horton
Associate Professor of Biology
University of Iowa

Subscribers receive notices of native plant and environmental events, may participate in the discussions and share information with the group.

To subscribe send an email to: iowa-native-plants-request@list.uiowa.edu

JOIN THE IOWA NATIVE PLANT SOCIETY TODAY

In 1995, a group of Iowa’s native plant enthusiasts formed an organization to promote and preserve native flowers, grasses, trees and other native plants and their prairie, woodland and wetland habitats.

The Iowa Native Plant Society provides a forum for the exchange of ideas and information among gardeners, professional and amateur botanists and other native-plant lovers who are dedicated to:

- conservation and ethical use of Iowa's plants.
- education about and preservation of Iowa's plants and their habitats.
- appreciation and enjoyment of Iowa's native flora.

Your membership will help promote these goals.

For details on the Society’s field trips, workshops, small grants, and educational products visit:
