

Mathematics	History	Presentation	Extension
30	10	5	5

Criteria for Mathematics:

- Mathematical content is correct and answers the question(s) completely (this is the single most important factor in determining your score)
- Originality
- Depth

Criteria for History:

- Correctness of historical content
- Appropriateness of historical content to project

Criteria for Presentation:

- Follows given format rules
- Spelling, grammar and punctuation
- Appearance, including typeset formulas, and quality of any illustrations

Criterion for Extension:

This is going above and beyond merely satisfactory, and is achievable in a variety of ways. For example, mathematics beyond what is asked for (that is relevant), unusual mathematical originality, having a mathematically very difficult project, or greater historical depth and originality.
