        passwd: xxx
pub -> lschmerr -> EM 350 2008

The course grade will be tentatively based 1/3 on the homework, 1/3 on the mid-term exam, and 1/3 on a term paper (due at the end of the semester). Suggested term paper topics are listed on the website.

Most homework problems are MATLAB-based so it is essential you become comfortable in working with this package. MATLAB is available campus-wide so you should have access to this software.
