Guidelines for CVM Public Art image submission:

1. Images should depict the science and technology of the veterinary profession. We do not want images of people and animals as those will be shown in the larger glass sections.

2. The images could be actual photos of anatomy, or diagnostic images (radiographs, ultrasound, MRI, etc.). They could be microscopic images, gene maps, diagrams of physiologic processes, “cartoons” of pathogenesis, images of past or present surgical instruments, pretty much anything. We are looking for images that represent the diversity of our profession (research, practice, public health, diagnostics, treatment, history, production medicine, companion animal, microscopic, gross specimens, etc.)

3. Submission does not guarantee selection.

4. You can send the images via email (or hard copy) to me (contact info below)

5. Please include the following Copyright statement with your submission. By submitting this image I acknowledge that this is an image of my own creation or that I am the copyright holder. I grant the Board of Regents, State of Iowa acting for Iowa State University (Owner) the right to use this image in art work in the college as well as a royalty-free, irrevocable license to make two dimensional reproductions of the Art Work for educational and/or museum purposes, including but not limited to reproductions used in advertising, calendars, posters, brochures, clothing, media, publicity, catalogues, museum, educational and development projects, or other similar publications, provided these rights are exercised in a professional manner, which license shall be assigned by the Owner without the consent of the creator.

6. I will not be able to return images submitted unless special arrangements are made. So please don’t send me your only copy.

7. Contact me if you have questions. We need lots of images and look forward to seeing the diversity of our profession in the images you submit.
