Course Description: MATH 265. Calculus III. (4-0) Cr. 4. F.S.S.S. Prereq: Minimum of C- in MATH 166 or MATH 166H. Analytic geometry and vectors, differential calculus of functions of several variables, multiple integrals, vector calculus.

Course Objectives: A listing of the course objectives can be obtained from Blackboard.

Textbook: Thomas’ Calculus, Early Transcendentals, 12th edition, by Weir and Hass. (Pearson). We will be covering the following sections of the textbook, though we will divide the lectures among the chapters differently from the course syllabus:

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Sections</th>
<th>Classdays</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chap. 12</td>
<td>1-6</td>
<td>6</td>

<td>1-7</td>
<td>8</td>
</tr>
<tr>
<td>Chap. 16</td>
<td>1-8</td>
<td>10</td>
</tr>
</tbody>
</table>

Online Materials: We will be using Blackboard to coordinate the course. Announcements, this syllabus, and other resources will be available there.

We will be using MyMathLabs course supplementary material on the internet for various things, including homework. You will need an access code to use the MyMathLabs system. The textbook came with one, but you may need to purchase another one for this course. More information can be found in Blackboard. The MyMathLabs system may be accessed through Blackboard–in the Blackboard course, there is a link in the control panel in the left hand column that will take you to the MyMathLabs system. You will need to enroll in the course–instructions are posted in Blackboard.

Absences: Absences from lectures will incur no penalty. Make up exams will be given only with documented excused absences. See the Mathematics Department’s policy on makeup exams.

Grading: Available points are as follows:

<table>
<thead>
<tr>
<th>Assignment:</th>
<th>Date:</th>

The following overall percentages will assure you of the associated letter grade: 90%: A; 80%: B; 70%: C; 60%: D. There may be a curve at the end of the semester. No individual exams will be curved; do NOT ask!
**Exams:** There will be four in-class midterm exams, which occur during class time. Each midterm exam will cover the material specified in the above table. The final exam will be comprehensive.

**Exercises:** Exercises will be assigned for each lecture. The assignments are given in MyMathLab. You may attempt exercises more than once in order to improve your score, but the exercises are due at 11:59pm one week after being assigned. Again, you may attempt them several times during that one week period.

**Dead Week:** There will be assignments due on the Monday and Friday of Dead Week.
